Eat Healthy

Did you know? We make 200 decisions about food each day. That’s a lot of chances to eat healthy every day. All of your food and drink choices matter!

Nearly 2 out of 3 women in the United States die from chronic diseases like heart disease, cancer, or diabetes. A healthy diet and weight can help protect you from many chronic diseases. Choose lots of fruits, vegetables, whole grains, low-fat dairy, and lean proteins to keep you healthy.

Fruits and vegetables are a great way to get the vitamins and nutrients you need!
- Potassium can help lower blood pressure.
- Fiber from fruits and vegetables can help lower cholesterol.
- Vitamin A keeps eyes and skin healthy and helps to protect against infections.

Tips
Switch some of your everyday foods for healthier options.
- Eat whole-grain bread instead of white bread, and brown rice instead of white rice.
- Try whole fruit, like apples and oranges, instead of fruit bars or fruit-flavored snacks.
- Drink water, seltzer, or unsweetened tea instead of energy or fruit drinks or soda.

Schedule your well-woman visit
A well-woman visit is a time to see your health care provider to:
- Discuss family history, family planning, and personal habits, such as alcohol and tobacco use
- Schedule necessary tests, such as screenings for high blood pressure, high cholesterol, and obesity
- Set health goals, such as being active and maintaining a healthy weight

Learn more about healthy eating habits at ChooseMyPlate.gov.
- Track your daily food plan with SuperTracker.usda.gov.
- Learn more about National Women’s Health Week at womenshealth.gov/nwhw.
