Supporting nursing women can work, even in transportation or city service jobs. Companies have used many creative solutions to give employees time and space to express milk at work. They can be inexpensive and easy to put into place. They are also highly valued by employees and help improve employee retention, productivity, and morale.

**Bottom-Line Benefits to Business**

Support for employees who are nursing their children is a valued employee benefit. It is also good for the company’s bottom line, yielding a 3 to 1 Return on Investment\(^1\) due to:

- Lower absenteeism rates of both mothers and fathers (since breastfed babies are healthier)\(^2\)
- Higher retention rates (94% among employers who support nursing moms vs. national average of 59%)\(^3\)
- Lower health care costs and insurance claims when infants are breastfed\(^4\)
- Higher productivity and loyalty among workers\(^5\)

**ACA Requirements**

Section 7 of the Fair Labor Standards Act has been amended to provide for basic accommodations for nursing women during the work period, including:

- Reasonable time to express milk during the work day
- Private space that is not a bathroom

The law applies to businesses of all sizes, and creative solutions abound. Learn more at the U.S. Department of Labor at [www.dol.gov/whd/nursingmothers](http://www.dol.gov/whd/nursingmothers).

**Simple Space Solutions**

Nursing women require privacy to express milk. Permanent or flexible spaces can be created in main office buildings. Mobile facilities, such as portable lactation spaces, might be an option for women who work in...
Companies can also partner with nearby businesses to accommodate nursing mothers who travel as part of their job. Options include:

- Space in small office or storage areas
- Flexible space in a manager’s office or employee break area
- Retrofitted portable restroom placed in safe locations
- Private vehicle with privacy coverings for the windows
- Indoor office space at the main office, fire stations, police stations, etc.

Shared space with other businesses in the community (e.g., hotels, government buildings)

The space does not need to be large. Typically a minimum of 4’ x 5’ may be enough for a chair and flat surface for the breast pump. An electrical outlet is valued by moms. Signage and a well communicated policy helps protect the privacy of the employee if a locked door is not possible.

**Time Solutions**

Most women use their usual breaks and meal periods at work to express milk. Creative scheduling can help adjust for breaks. The time needed to express milk is around 15-20 minutes per session. If the employee has to travel a long distance to get to the space, she might need longer for her breaks. Coverage, if needed, can be provided by other employees or managers.

**Storing Expressed Milk**

A refrigerator is valued but not required. Moms can also store their milk in their own personal cooler.

**Other Considerations**

A written policy helps assure that all levels of staff have equal access to support, and that the needs of nursing moms will be respected. Include benefits of the company’s support as part of new employee orientation so all employees will be aware of the company’s policy. Many companies include information about the legal requirements and practical solutions in their supervisory training.
